├── api/
│   └── (API interface files and endpoints)
├── docs/
│   └── (documentation files and plans)
├── LICENSE
├── CONTRIBUTING.md
└── README.md ℹ
```

Notes

This directory structure is designed to keep the landwatcher-api project organized, maintaining a clean separation between source code, API interfaces, and project documentation.

- src/ will hold core scripts and utilities.

- api/ will manage property data queries and logging systems.

- docs/ will include plans, PDFs, and records for contributors and maintainers.

- LICENSE details project rights and restrictions.

- CONTRIBUTING.md guides open-source collaborators on ethical contributions.

- README.md ℹ offers a comprehensive overview of project purpose, setup, and community information.

Created in Computer Modern Typewriter font for a vintage typewriter aesthetic.
